CAMERON REMESZ

FRONT-END WEB DEVELOPER

PROFESSIONAL SUMMARY

I'm a front-end web developer with a heavy focus on solving business problems through critical thinking and teamwork. With a background in commercial/retail management I use my communication and decision making skills to help any team execute their goals. I use a client first approach to build accessible, engaging and responsive web sites and applications.

EDUCATION

Juno College Of Technology Bootcamp
Graduation Certificate | Aug 2021 - Oct 2021

Studied HTML, CSS, SASS, JavaScript, REST APIs, Firebase, Git/GitHub, Web Accessibility, Responsive Design, Wireframing/Prototyping, Paired Programming, Team Collaboration, Public Speaking, Technical Communication

PROJECTS

Bar One - View Live Project
HTML, Sass, Javascript
A multi-page responsive website for a pub. Built using HTML, Sass & JavaScript to replicate a designer provided PSD and hosted on GitHub pages.

Global Weather Watch - View Live Project
HTML, CSS, jQuery, Open Weather Map, Unsplash & Mapbox APIs
A user searches a city to return the current weather, a map view and a background image of the searched city. Built using name spacing, passing data returned from an API call to the next, error handling and hosted on GitHub pages.

Chatter - View Live Project
HTML, Sass, React, Firebase Auth, Firebase Realtime Database
A real-time chat app where the user must log in with google, has the ability to send a message and also clear the entire chat. Built using React hooks and functional components connecting to Firebase services to implement persistent data/authorization and hosted on Netlify.

PROFESSIONAL HISTORY

Commercial/Retail Manager

Kal Tire | Sept 2012 - Jan 2018

It was my responsibility to monitor and increase store growth by analyzing profit & loss statements and implementing store and team action plans. I was also tasked with maintaining and gaining fleet customers by engaging in outside sales/sales calls to build and maintain these relationships and increase commercial sales for our store.

Freelance Web Developer

Self-Employed | Sept 2019 - present

I was hired to build websites for a few small businesses, creating marketing plans, branding, implementing SEO strategies for the clients by understanding the client needs & goals then building the websites using HTML, CSS/Sass, JS and on occasion a CMS (Weebly, Wix).
