CAMERON REMESZ

FRONT-END DEVELOPER

PROFESSIONAL SUMMARY

Front-end developer with ~7 years experience (4 years with Angular) building web applications. I solve business problems through clear UI/UX and cross-team collaboration. With management experience, I bring strong communication and organization to deliver reliable, maintainable software.

SKILLS

- AI / LLM Development: AI development (Claude)
- Frameworks / Libraries: Angular, React
- Languages / Tools: TypeScript, JavaScript, RxJS, SASS, Tailwind, Java
- Testing / CI: Cypress, Selenium (Java), GitHub Actions
- Other: Firebase (Auth, Realtime DB), REST APIs, Git/GitHub/GitFlow, Agile/Scrum, MSW (API mocking), idb-keyval (mock DB)

EDUCATION

Juno College Of Technology Bootcamp
Graduation Certificate | Aug 2021 - Oct 2021

Studied HTML, CSS, SASS, JavaScript, REST APIs, Firebase, Git/GitHub, Web Accessibility, Responsive Design, Wireframing/Prototyping, Paired Programming, Team Collaboration, Public Speaking, Technical Communication.

PROFESSIONAL HISTORY

Front-End Developer

ZIRO Technologies | Mar 2022 - Present

- Stepped up to co-own UI engineering efforts and cross-functional feature deployment following a major structural team reorganization.
- Implement AI best practices in an enterprise codebase using Claude (design prompt templates, response validation, and safety checks).
- Head UI efforts for OKRs and cross-release features, coordinating with backend, product, and engineering leads.
- Write end-to-end tests in Java with Selenium to maintain code quality and coverage.
- Migrate legacy AngularJS pages to modern Angular (modernized architecture, removed deprecated modules).
- Implement user-requested features, components, and pages.
- Improve developer experience and reduce dev time by introducing MSW (API mocking) and idb-keyval (mock DB) for local unit/integration testing.
- Lead application branding and styling updates to ensure brand cohesiveness and marketability.

Operations Manager

MicroMech | Jun 2019 - Jun 2021

- Built supply chain processes and analyzed financials to create business plans (owned process design and implementation).
- Generated profit & loss reports from company databases using SQL to ensure profitability and reduce costs.
- Coordinated with CMO, CTO, and development teams on app development and marketing strategy.

PROJECTS

Poorcast - View Live Project | Github Repo
Angular, TypeScript, NgRx (Redux), RxJS, Cypress, Github Actions, Product Development Lifecycle
A budgeting app focusing on enterprise state management and reactive forms; experience with prototyping, user stories, scope management, authentication, CI/CD, and automated testing.

Chatter - View Live Project | Github Repo
React, Sass, Firebase Auth (Google), Firebase Realtime Database
Real-time chat app with Google authentication, built with React hooks and hosted on Netlify.

NgRx Reactive Forms - View Live Project | Github Repo
Angular (Reactive Forms), TypeScript, NgRx (Redux), Tailwind
Todo app built to learn Redux patterns and Angular reactive forms; explored alternatives to Subject-based service patterns.
